Endless **sensations**

When hands meet earth and soil, they reactivate the deep bond that binds us to nature. Endless sensations are born, exploiting the potential of creativity through refined craftsmanship.

Combined with the fine and elegant structure of linen, these sensations create a new material, to allow the sensibility of designers to express with free and natural breath.

A material that finds in the many colors of the earth, a design that is capable to reconcile variety and organicity, knowing no limits of expression.

Ours is both an assortment of collections and a style project that combines endless collections that are similar in tone and application. Their ability to "speak the same language" and co-exist in harmony offers an extraordinary creative tool that can breathe life into contemporary architecture and interior design.

Surfaces with **an endless** architect character

World-class technology with a new inventive design, our latest product – Endless – adds a whole new dimension of appeal. Imagine walking into the lobby of a city hotel or commercial tower where the entire floor looks like one single piece of marble. This is commonplace in commercial developments in Asia, with Bonza Ceramics contributing to the creation of spectacular spaces in the biggest hotel chains. Bonza is a carbon neutral manufacturer, while porcelain products make a strong argument for being environmentally friendlier and more ethically sourced compared to quarried stone – there's a whole other discussion to be had about this.

A wide range of decorations enriches and enhances Endless's marble-effect floor and wall tiles. Refined geometric decorations and precious mosaics add value to every application for floors and walls, creating a contrast that brings out the beauty of the material and adds a unique dynamism to the space.
