BONZA 

Made in India
with Love

DDDI

thought behind the design process
.....

Discover

We continuously work to discover the very best materials and technologies to create experiences of living without boundaries.

Define

We then define our purpose as to why we create something that is not only aesthetically pleasing but is also capable of creating an impact on how a space functions.

Design

Bonza then works on curating designs that surpass the highest standards of beauty, resistance, versatility, and sustainability when they are put to test.

IMPLEMENT

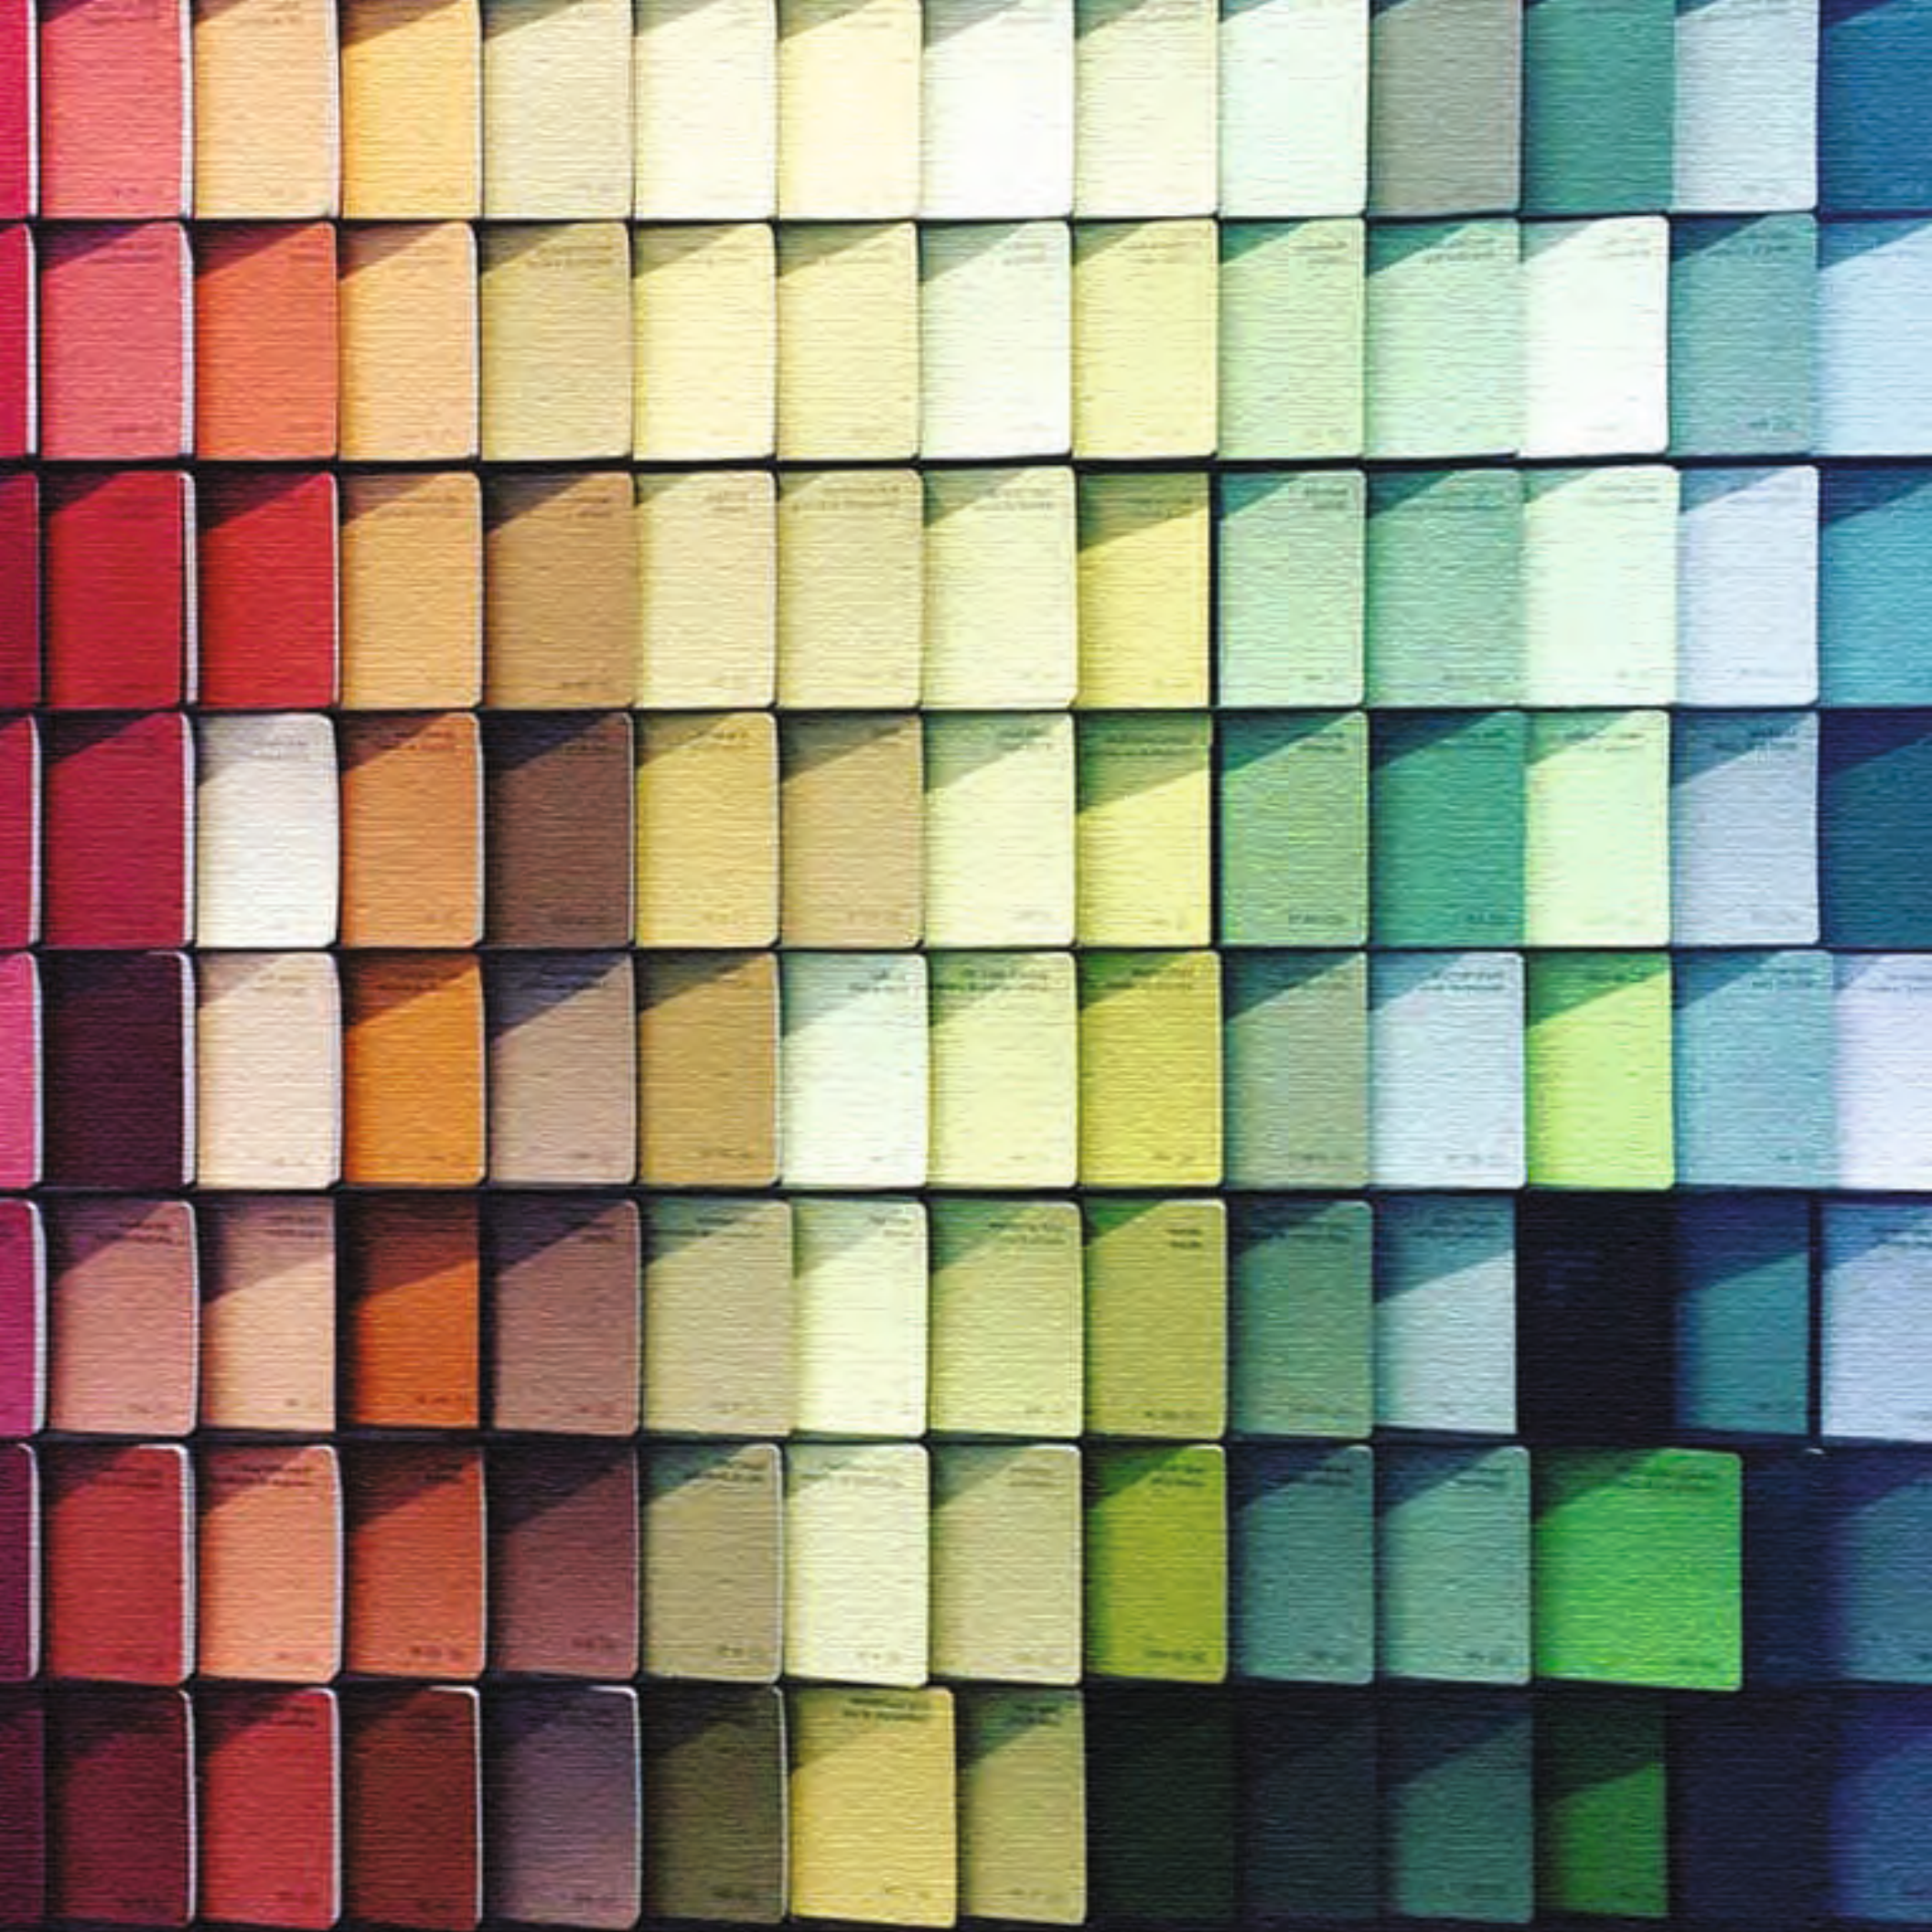

We make sure to implement our strong and stable values in all of our projects and never give our customers a reason to choose something else.

Beauty, resistance, versatility, and sustainability, Bonza has it all. Bonza's sole purpose has been to create a better tomorrow. Ceramic excellence is what we want to incorporate into every space through sheer design supremacy and creativity. We always pay attention to details and make sure of the fact that our products are innovatively genius and crafted using advanced technology and injection machinery.

Top-quality technologies
and solid knowledge
of the ceramic heart. ❤️

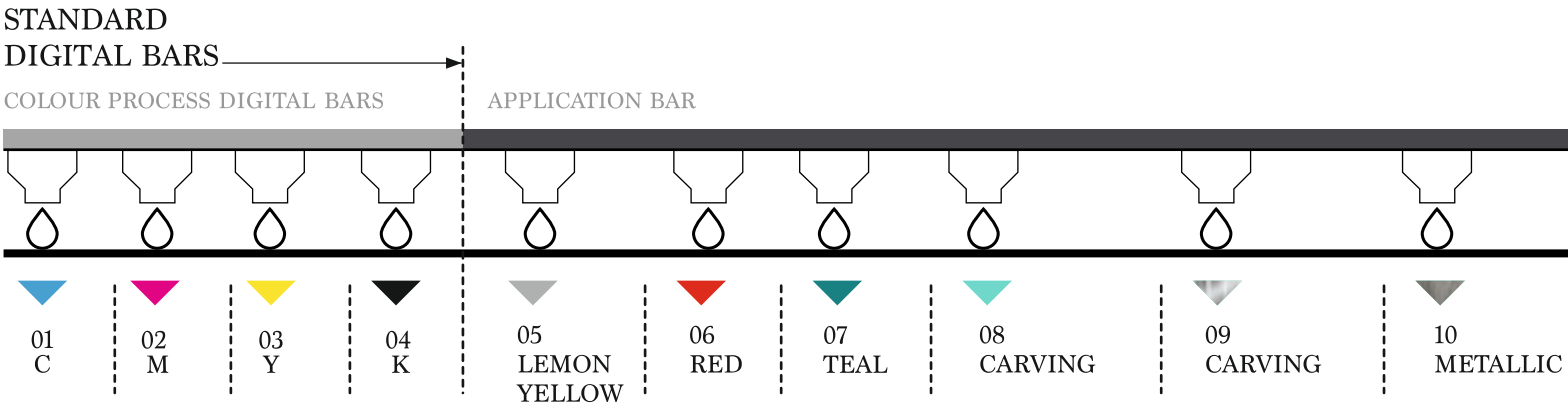

A little space to be colorful

Thanks to the ceramic digital material we use, it is possible to achieve particular texture, surface and light effects, which give products a natural look and great aesthetic value.

Design Thinking
gives us the tools
to explore
What Could Be

tonalità

01

43

Glorious

79

tonalità

Tonalita is a swirl of emotions, always different and yet always authentic: offering many hues united by complex technological processes used to mix the grains, continuing from the reference tradition. The result gives the effect of random composition, a surface of many facets that reflects the different textures of the materials mixed to create it - available in high gloss finish.
